Projects

Text Based RPG game

Solo Leveling RPG is a deep and rich text based Adventure game unlike anything else. Complete with charming ASCII graphics, the player is lost in an otherworldly cave and needs to navigate through the locations while battling various species of monsters. This game internally consists of minigames like Impossible Tic Tac Toe, Classic Snake Game and Maze Runner

Tools used : Python

Supermarket Billing System

This software project is a basic supermarket billing system with some extra features. This system is designed to provide customers with fast data processing and bill generation. The billing database contains a massive collection of product names, prices, and other product-specific information. When a product is billed, its price is added to the bill based on the quantity of the product. The system also includes discounts on various products, allowing the product to be offered at a lower price when billing.

Tools used : C++

Spotify Clone

This is a website that mimics the appearance and some of the basic functionalities of Spotify, a popular music-streaming platform.

Tools used : HTML, CSS, JavaScript
